

IRLJ 6.6 Exhibit "A" Cover Letter

IRLJ 6.6 speed measuring device: design and construction certifications for courts.

To: District Courts

See date in footer for document date.

Cc: Court Clerks, Prosecutors, Public Disclosure Officers, General Public, Etc.

From: Steen Nicholson, Anthony Hillock

RE: SMD IRLJ 6.6 (b) "**Exhibit A**" Radar and Lidar Certifications for courts.

1. For courts that would like to keep a hard copy on file with **all the WSP SMDs** listed we have attached "Exhibit A". "Exhibit A" derives information from the WSP SMD-CM data base. See Exhibit A for details about individual SMD certifications.
2. For discovery requests you may choose to provide the address to the website where such evidence is accessible to the defendant. We recommend providing the following website address with instructions. <http://www.wsp.wa.gov/traveler/smdhome.htm>

The Washington State Patrol has developed an on-line storage location for our IRLJ 6.6 speed measuring device: design and construction certifications for courts.

The certifications will be maintained by the WSP as a public record on the WSP website:
<http://www.wsp.wa.gov/>.

The following is the procedure to obtain an IRLJ 6.6 speed measuring device: design and construction certification for courts. Once on the website.

1. Go to the **Driver & Vehicle** tab. Under **Quick Links** to go to **SMD Certifications**.
2. Click on "**IRLJ 6.6 Design and Construction Certifications for Courts**".
3. You will need both Certifying Officials reports to have a complete listing of SMDs.

The following is the procedure to obtain an **individual Public Record SMD certificate**. Once on the website.

1. Go to the **Driver & Vehicle** tab. Under **Quick Links** to go to **SMD Certifications**.
2. Click on "**Search for a Speed Measuring Device Here**".
3. Enter the **Tag number** of the SMD include the "L----" or "R----" prefix in the search.
4. This will bring you to the **SMD Device Details** and **Certification History**.
5. In the **Certification History** area select **View Certificate** for the certification date you are interested in.

Questions about this on-line format and procedure can be directed to:

WASHINGTON STATE PATROL (WSP)
CERTIFICATION CONCERNING DESIGN AND CONSTRUCTION
OF ELECTRONIC SPEED MEASURING DEVICES
OR LASER SPEED MEASURING DEVICES
SEE: IRLJ RULE 6.6 EFFECTIVE 1/3/2006

I, Anthony Hillock, do certify under penalty of perjury under the laws of the State of Washington that the following is true and correct:

I am employed with Washington State Patrol as an Electronic Design Engineer, Speed Measuring Device (SMD) Expert, and assigned as co-custodian of the SMD records. I have been employed in such a capacity since January 2010. Part of my duties include, supervising the maintenance and repair of all types of electronic and laser SMDs used by the Washington State Patrol.

The Washington State Patrol currently uses the following types of SMDs:
(See Exhibit "A" for specific details on individual SMDs listed by TAG number)

| Type | Manufacture | Model |
|-------|-------------------------|--|
| Radar | Kustom Signals | Eagle 95, Falcon, Pro-1000 DS, Trooper |
| Radar | Decatur Electronics | Genesis I, Genesis II, GHS, VPD |
| Radar | Applied Concepts | Stalker DSR, DSR II |
| Radar | MPH Industries | BEE III |
| Lidar | Kustom Signals | PRO Laser II, III, IV |
| Lidar | Laser Technologies Inc. | LTI 20-20, UltraLyteLR, TruSpeed, TruSpeed S |

All SMD models used by the Washington State Patrol are on the Conforming Products List issued by the International Association of Chiefs of Police and are tested to the standards specified by the National Highway Traffic Safety Administration.

I possess the following qualifications with respect to the above stated SMDs:

Five and one-half years military experience as a precision measurement equipment specialist. Ten and one-half years experience with McDonnell Douglas calibrating and repairing test measurement and diagnostic equipment including aircraft radar test equipment and police SMDs. Five years as a Metrologist with Verizon working on electronic test equipment including SMDs. Eight years as a Senior System Technician with Day Wireless working with SMDs for counties and cities in the Northwest. I have successfully completed a course in repair and service of Doppler radar and Pro-Laser lidar systems by Kustom Signals, Doppler radar SMDs by MPH Industries and Laser Speed Detection systems, by Laser Technologies Inc. I have completed the WSP Speed Measuring Course for Radar and Lidar at the Washington State Patrol Training Division, Shelton Washington. I hold an FCC General Radiotelephone Operator License (GROL).

The Washington State Patrol maintains manuals for all of the above stated SMDs. I am personally familiar with these manuals and how each of the SMDs are designed and operated. On the date indicated on Exhibit "A" the SMD was tested using WSP procedures under the direction of an authorized SMD expert. The results were evaluated and certified by a WSP SMD Expert as the Certifying Official to meet or exceed existing performance standards and entered into the WSP SMD-Certification Management data base.

The Washington State Patrol maintains a testing and certification program that requires each SMD to be tested and certified for accuracy at least once every two years.

The Radar SMDs utilize the Doppler Effect to accurately measure speed. Testing consists of transmitting selected frequencies from a precision signal generator to simulate various speeds. The SMD must indicate the correct speed \pm 1MPH in the stationary mode and \pm 2MPH in the moving mode (where applicable).

The transmit center frequency for the radar unit is verified using appropriate test equipment to be within \pm 100 MHz of specification.

Tuning forks, used by the operators to perform daily checks, are tested to ensure their accuracy to \pm 0.5 percent as specified by the manufacturer. All operator daily performance tests are verified.

Lidar SMDs accurately measure speed based on the velocity of light and a precision time base reference. Testing consists of verifying Head Up Display aiming reticle, internal self-test, fixed distance check, delta distance check and reference oscillator check. An operational road test is done by comparing the lidar to a certified radar SMD.

On the date indicated in the incorporated document attached as Exhibit A, each SMD was tested by the trained technician listed therein per the WSP SMD Standard Operating Procedure Manual, under the direction of the listed certifying official. The certifying official is an authorized SMD Expert who, evaluating the test procedure and results and knowing the technician's qualifications and test equipment used, certifies that the SMD meets or exceeds the existing performance standards and enters this information into the WSP SMD-Certification Management data base.

The technicians listed on Exhibit A receive training in the proper use and operation of SMD test equipment and performance testing procedures used to test Laser and Radar SMDs. After successfully completing training the technician receives authorization allowing them to enter the results from the tests into the SMD-CM data base for review by an Expert.

Based upon my education, training, experience, knowledge of the SMD models listed above and review of the relevant Washington State Patrol records created at or near the date of testing by the trained technician identified on Exhibit A and entered under penalty of perjury, it is my opinion that each of these electronic pieces of equipment is so designed and constructed as to accurately employ the Doppler effect in such a manner that it will give accurate measurements of the speed of motor vehicles when properly calibrated and operated by a trained operator or, in the case of the laser SMDs, each of these pieces of equipment is so designed and constructed as to accurately employ measurement techniques based on the velocity of light in such a manner that it will give accurate measurements of the speed of motor vehicles when properly calibrated and operated by a trained operator.

Individual Performance Tests and Certification of the tests are entered into the SMD-CM data base under the penalty of perjury by entering an authorized user id and password to authenticate it.

Exhibit "A" derives information from the SMD-CM data base. See Exhibit A for details about individual SMD certifications.

This certificate describes the WSP SMD program.
